ELCOM

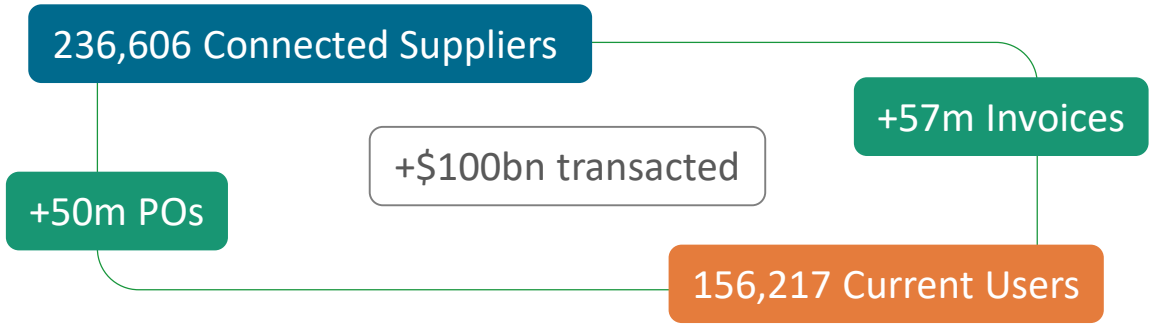
TRUSTED TECHNOLOGY, TAILORED SOLUTIONS

Tony Pinn, Director, e-Funding, ELCOM

Integrated Supply Chain Management and Funding

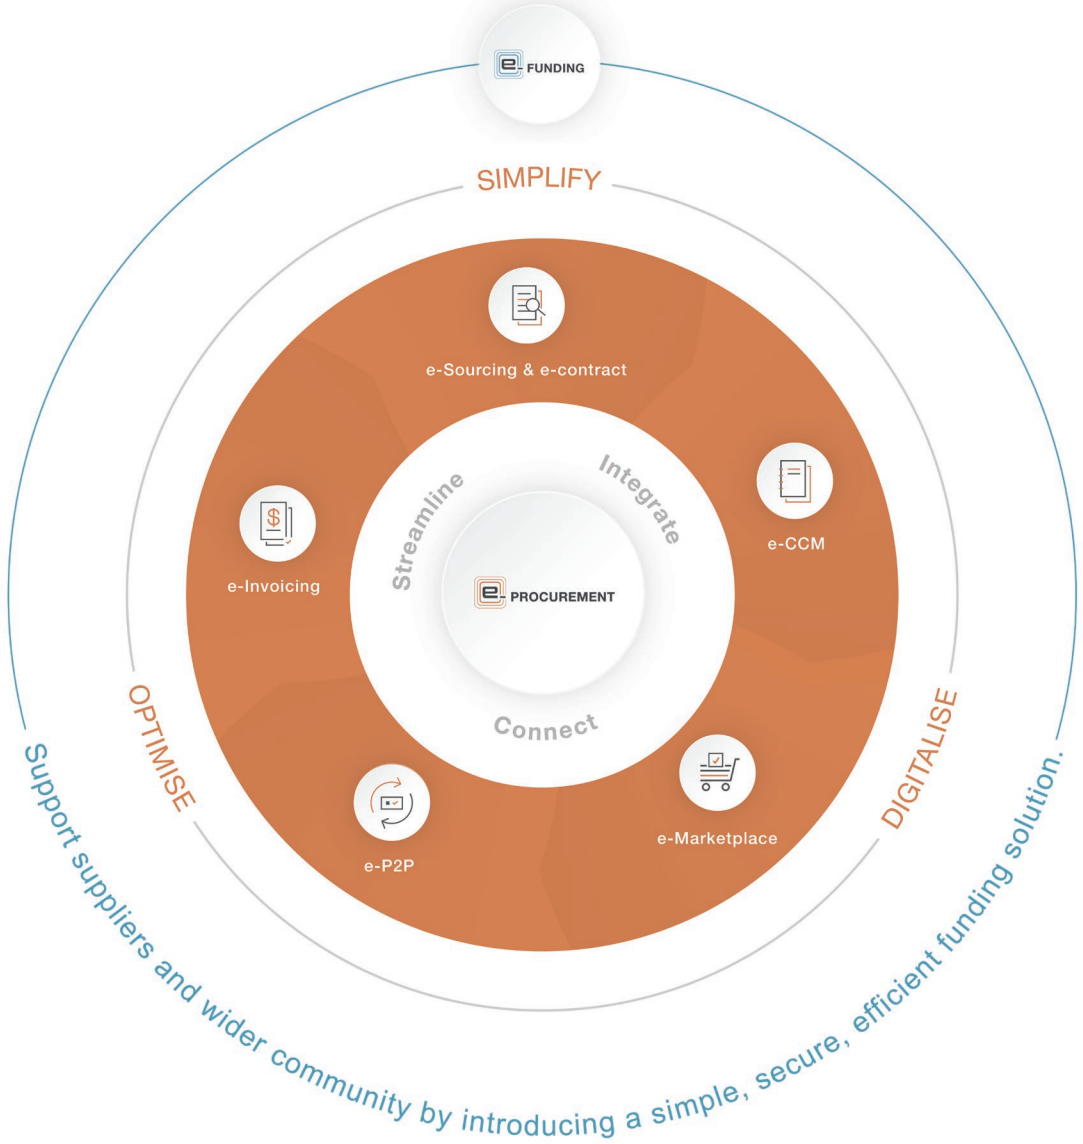
Elcom – An Introduction

- Elcom has been operating successfully for the past 20 years
- Elcom has played a leading role developing and supporting automation of web-based P2P, e-invoicing and AP processes through its best-in-class procurement technology, **PECOS**



- Following on from this success in P2P, Elcom have also introduced **eFunding**, an innovative supply chain funding solution.

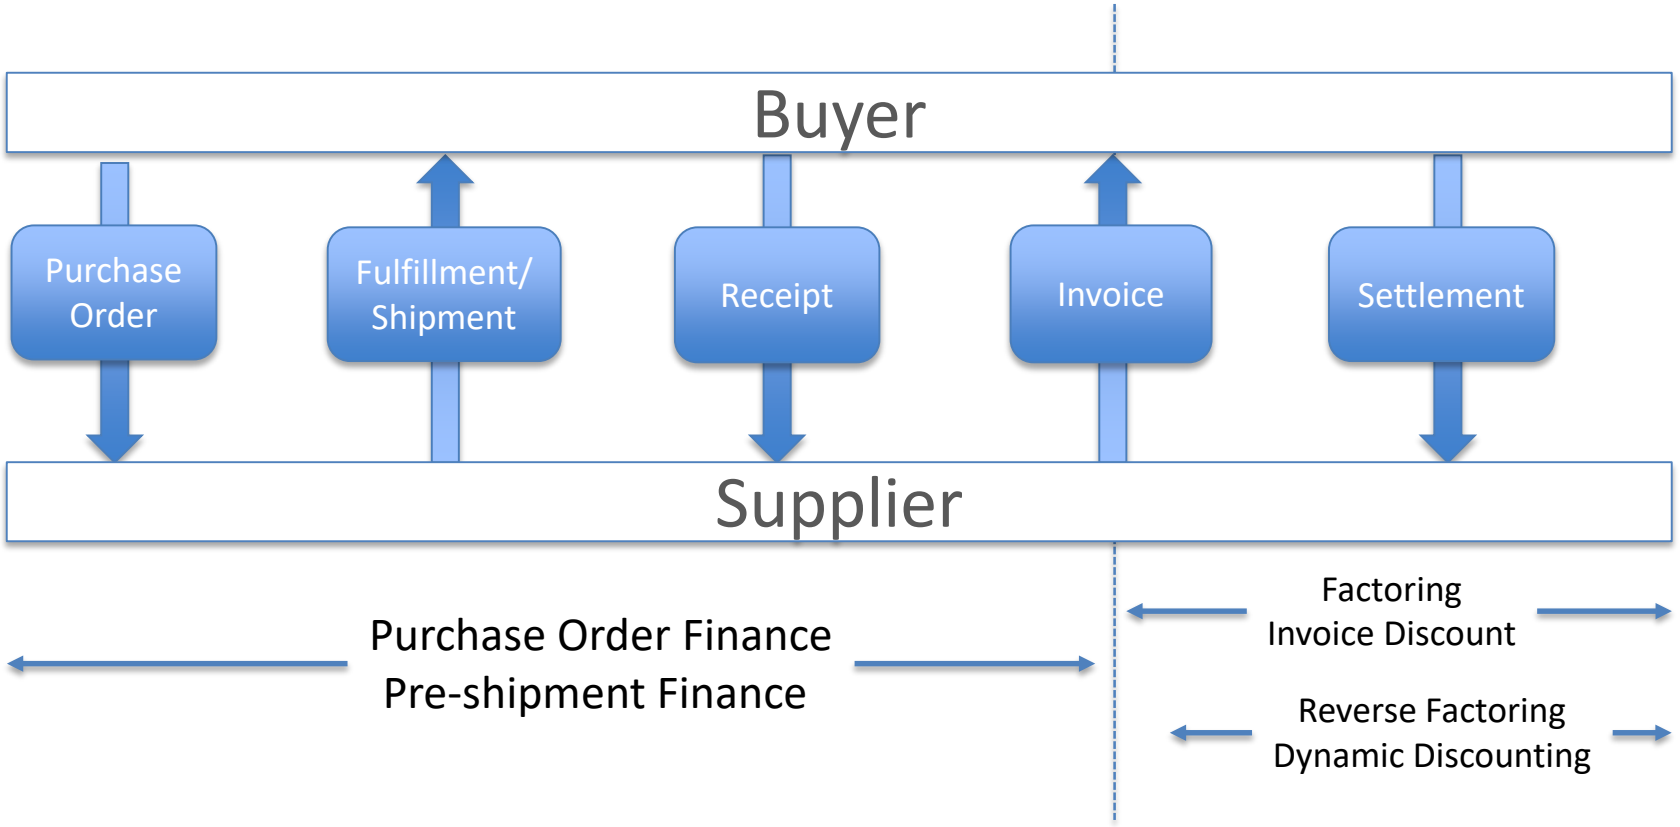
Automated Supply Chain Management



What is eFunding?

- eFunding is able to facilitate the provision of finance from receipt of a Purchase Order through to settlement of the relevant invoices
- The programmes can often offer suppliers up to 80% of PO value and 100% of qualifying invoices
- Funding is fully automated, managed by Elcom and based on PO and Invoice information extracted from each buying organisation's systems

Provision of Value



Summary

- Effective supply chain automation creates value to all participants
- Supply Chain Finance is an effective working capital management tool if targeted correctly
- Larger businesses should consider opportunities on both sales and purchase sides
