Making the case for using real time payments to bank accounts

Income Group is an FCA regulated real time payments processor

We work with business payment users to uncover the true cost and risks of making payments

We demonstrate how to reduce cost by 50% or more and how to lower risks

Our recent focus is to help payroll users

Our IGsend solution enables payroll payments in 3 seconds not 3 days, for pence not pounds

Market demand is adapting IGsend to tackle accounts payable and cross border payments

Payroll workflow - In depth
